of Technology
& COPSS Leadership
Academy

Topic: The Role of Bayesian Statistics in an Age of AI

Join us in a discussion exploring how Bayesian methods can enhance transparency, interpretability, and decision-making in modern AI systems.

This session will highlight the latest advances in Bayesian learning, robust inference, and interdisciplinary applications, offering insights into how these approaches address complex, high-dimensional problems across fields such as neuroscience, genomics, environmental science, and beyond.

TUESDAY, JANUARY 27, 2026
8-9 A.M. ET / 5-6 A.M. PT

**NO FEE, ZOOM
PRE-REGISTRATION
REQUIRED**
